Cabinetry

Walls

Countertops

- All selections are available at Home Depot

Backsplash

- Neutral in color to compliment countertop
- All of these suggestions are available at The Tile Shop

Flooring

- Hardwood or LVP
- Warm tones in medium to medium dark – *MAKE SURE THAT IT HAS AN ELEMENT OF GOLD AND LOOKS NICE WITH THE OAK WOODWORK/DOORS*
- Wider planks are “in” right now
- Use same product in Sunroom

Range Hood/Mantle

- Hood enameled to match cabinets or a slate grey – if you do the hood in a contrasting color, then paint the island that color as well.
- Consider a contrasting hood apron in wood that compliments the floor.
- Cabinets to be touching hood on both sides. There isn't enough room to do an sloped hood.
- Beef up the mantle using dark wood.

Counter Stools

- If island is enameled white, then choose a very dark finish (black or bronze).
- If island is enameled dark, then choose a lighter wood finish that compliments the floor.
- Choose a neutral fabric that compliments the enameled cabinets.
- Style to be short back or no back – swivel would be great.

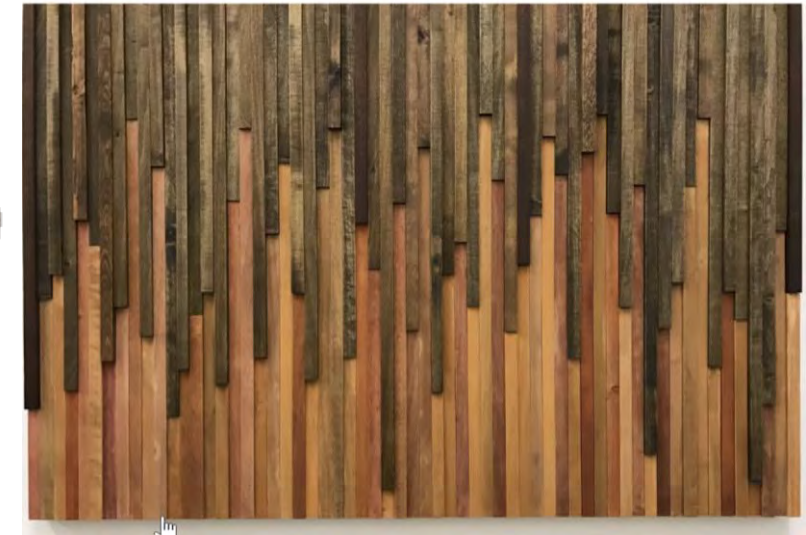

Cabinet Hardware

* Black knobs or pulls (need to drill more holes).

Above Cabinet Décor

- 3-D Art
 - To be about 24" x 12"
 - Hang on wall left of fridge and left of sink
- Vases
